

## All together now? Reflecting on the co-creation of climate action and adaptation support tools by local governments and researchers

Date: **Thursday 17 January 2019, 11:00 – 12:30** | Webinar | [Registration](#)

City leaders and practitioners across Europe are rethinking their policy programmes and setting up new initiatives to adapt to the impacts of climate change. But local climate adaptation is a complex policy area requiring diverse forms of knowledge – not just from scientists, but also from citizens, business, civil society organisations and staff in many municipal departments. This means trialling approaches which go beyond ‘business as usual’, to incorporate local knowledge into scientific research, and in turn to apply new knowledge effectively in decision-making.

In this webinar, municipal staff and researchers from Slovakia, Germany and the United Kingdom will share their experiences working together to co-create tools and methods supporting action for local climate adaptation – in particular for assessing risk, and for selecting and prioritising adaptation measures. Join us to find out:

- How the project team designed and implemented their co-creation process(es).
- Lessons learnt for research and practice.
- Impacts on cities’ local adaptation work.
- How the resulting tools and methods can support your city.

### Agenda

11:00	<b>Welcome and introduction</b> Julia Peleikis, Covenant of Mayors Office
11:10	<b>Co-creation – what, how and why? Reflecting on the project RESIN – Climate Resilient Cities and Infrastructures.</b> Angela Connelly, University of Manchester
	<b>Changing local planning approaches in Bratislava through co-creating climate solutions</b> Eva Streberova, City of Bratislava, Office of the Chief Architect
	<b>Co-creating an approach to risk and vulnerability assessment with Bilbao and Bratislava</b> Dr. Daniel Lückerath, Fraunhofer Institute IAIS
	<b>Bringing stakeholders together through co-creation</b> Matt Ellis, Climate Resilience Lead, Greater Manchester Combined Authority
12:10	<b>Q&amp;A</b>
